

Hello, I want to add something about VRS and I want to tell to please not base the speed answer because out this country might not enough interpreter and I am willing to wait for the phone call until my turn. I don't see a trouble with Sorenson's waiting line but my worry that you set that speed and how can Sorenson ability to improve the technology base on force without the success for community. For another rest VRS, I believe it can be united base with better interpreter skills and doesn't want a wrong interpreter to speak with those people get wrong idea of what I am signing. Sign language is important to have a good person to reading our language.

Again, the Sorenson is best for my option due they providing the great thing what I needed.
